

INFORMATION ABOUT:

Rockhounding on Public Lands

U.S. Department of the Interior

Bureau of Land Management

5353 Yellowstone Road
P.O. Box 1828
Cheyenne, Wyoming 82003-1828

Telephone 307-775-6256
Fax 307-775-6129

WHERE IS COLLECTION PERMISSIBLE?

Rockhounding is recognized as a legitimate recreational pursuit on nearly all of the 17.8 million acres of public land in Wyoming. These public lands administered by the BLM are open to everyone, to take limited amounts of rock material for noncommercial purposes without charge. Maps showing the location of public lands in Wyoming can be obtained from this office or the field offices (for addresses see information handout "WYNF-0007, BLM Offices in Wyoming"). You should check with the BLM field offices to become familiar with local procedures, policies and areas with authorized restrictions.

NO HISTORIC ARTIFACTS, PLEASE

The Archaeological Resources Protection Act of 1979 and the Antiquities Act of 1906 are designed to protect our Nation's cultural resources. These laws prohibit the unauthorized excavation, removal, damage, or alteration of any archaeological and historical site or object. Petroglyphs, human graves, old dwellings, pottery, stone tools, arrowheads, and other remains of Indians and early inhabitants are protected by law because they may provide important links to our past.

HOW ABOUT FOSSILS?

Fossil collecting has its own set of rules. Vertebrate fossils (which includes all bones and teeth) are off limits to rockhounders, but invertebrate and plant fossils that are not of special scientific interest may be collected in reasonable amounts for personal use. No fossils collected from public land can be sold, traded, or bartered. Please see the pamphlet titled Fossils on America's Public Lands available at BLM offices.

MAY PETRIFIED WOOD BE COLLECTED?

Hobby collection has special rules. Please see Fossils on America's Public Lands pamphlet. A material site contract must be obtained from a BLM office for collection of more than 250 pounds a year, or for commercial use.

COLLECTED BUT NOT DESTROYED . . .

Explosives or power equipment must not be used in excavating or removing petrified wood, and may apply to other collecting. Off-road vehicle use may also be restricted. Also, fossil and/or mineral collecting may be restricted or prohibited in some areas to allow dedication of the land for another purpose. Such restrictions follow official notice in the Federal Register and the areas are posted.

PERMITS?

The BLM grants permits to qualified individuals and institutions to conduct scientific research at archaeological, historical, and paleontological sites. These permits are issued and administered by the BLM Wyoming State Office in Cheyenne. Permits are given only to individuals holding advanced university degrees in archaeology, paleontology or a related field and are associated with an accredited institution.

REPORTING ARCHAEOLOGICAL OR FOSSIL SITES

All archaeological or paleontological sites such as prehistoric campsites, buffalo jumps, and fossils of many kinds may be of scientific interest. The sites should be reported to the nearest BLM field office for evaluation by archaeologists or paleontologists.

HOW ABOUT GEMSTONES?

The private collector is welcome to take specimens of gemstones as well as common variety minerals from public lands. However, a permit must be obtained from the BLM field office if common variety minerals are to be taken in large quantities or for resale.

“LOCATING” GEMSTONES

Claims may be “located” for gemstones under the general mining laws if location requirements can be met. Collecting gemstone specimens on public land remains an accepted recreational use of the public land, however...

DON'T BE A “CLAIM JUMPER”

Care must be taken not to violate the rights of a mining claimant. Patented claims are private land and permission to collect specimens on them must be obtained from the property owner. Unpatented claims, however, are still public lands and rockhounds may pursue their hobby on such lands as long as they do not interfere with mining activities or collect locatable minerals or gemstones for which the claim is “located”. In other words, if an unpatented claim is located for jade rockhounds can look for and collect any mineral except jade (claimants frequently locate claims for all locatable minerals). The claimant is entitled to the rights to the jade which is, for all practical purposes, his private property.

A claim owner may not legally charge fees for recreational use of unpatented claims.

FOR MORE INFORMATION, TRY . . .

For specific information on the distribution of minerals and rocks in Wyoming, we suggest requesting a publication catalog from: Wyoming Geological Survey, P.O. Box 3008, University Station, Laramie, Wyoming 82071 or by phone at 307-766-2286. Of particular interest is Survey Bulletin 66, “Minerals and Rocks of Wyoming,” by W. Dan Hausel, \$6, which is a summary of rock and mineral distribution in the state and Survey Bulletin 71, “Gemstones and other Unique Minerals and Rocks of Wyoming,” by W. Dan Hausel and Wayne M. Sutherland. These publications, and others, are also available for purchase at the Bureau of Land Management, Wyoming State Office, 5353 Yellowstone Road, Cheyenne, WY 82009.
